

RESEARCH STUDY

GOAL: Explore the work-related experiences of people with intellectual disabilities and improve the Vocational Fit Assessment Tool

Who Can Participate?

- Adults with ID, ages 18-22, who are currently engaged in work activities
- AND a person who knows them well and has been a part of their life for over 60 days (e.g., teacher, parent, job coach, employer)

What will you do?

- Interview partners will provide background information on the adult with intellectual disability and talk about what they are good at or work history.

How long will it take? Will I get paid?

Each interview will take about 2 hours. There will be 3 interviews: 1 now, in 12 months, and again in 24 months. Each participant will receive \$40 per interview, so \$120 total.

To participate or for more information, contact one of the researchers below.
